

COSMOTONIC

Our business is for outer space enthusiasts at any age. Children, adults, and elderly are able to learn about comets, planets, and stars in our family-friendly education center.

They can also experience astronauts in training first hand to see what practice tests they do and so what. For a price, you can actually get launched into space! This is the only thing we offer that has an age range, which is 21-60 year olds, for obvious reasons.
